

THE PROBLEM OF E-WASTE

Electronic waste (e-waste) is simply discarded electrical and electronic equipment and is one of the largest global waste streams. Unfortunately, much of it ends up in landfill, polluting the environment.

54 MILLION TONNES

Of e-waste disposed each year

17.4%

Of e-waste is currently recycled

\$57 BILLION

Worth of raw materials in e-waste generated each year

WHAT'S IN E-WASTE?
